

LEXNet NETWORK DIAGNOSTICS For Serial Interfaces

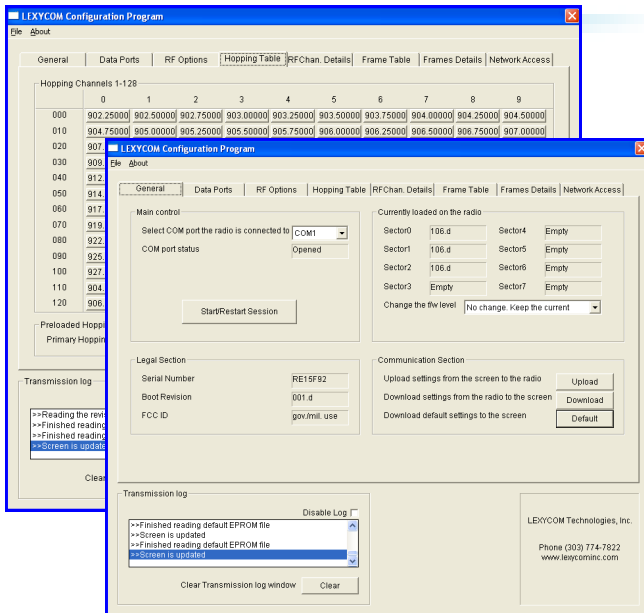

OEM Footprint: 3.18" x 2.89" x 0.47"

Rugged MIL-Type Enclosure: 4.5" x 6.2" x 1.6"

Extruded Aluminum Enclosure 4.72" x 4.06" x 1.2"

LEXNet diagnostics is designed to operate over a point-to-point, point-to-multi-point or a TDMA network.

LEXNet is free of charge for Lexycom customers and can be obtained from the Lexycom technical support department.

KEY FEATURES

- ⇒ LEXNet network management software is included with all radios
- ⇒ Allows for quick and easy network set up, management, maintenance and troubleshooting
- ⇒ User is able to remotely view, modify, and save the settings of all network radios
- ⇒ Data for individual radios in a network or radios for the complete network can be logged for a specific timeframe and then stored into a file for review
- ⇒ LEXNet can be run from any radio in the network (the user is not required to be at the Master site)
- ⇒ Intuitive Windows based software with an easy to use interface

System Requirements: Windows 95 or later. Less than 3 Mb of hard drive (includes help file with documentation).
